RETURN RECEIPT REQUESTED

Coyote East Fork Irrigation Company
c/o Bill Wiley
Antimony, Utah 84712

Dear Mr. Wiley:

July 17, 1989 Ray Owens and myself checked the amount of water that was being diverted into the Coyote East Fork Canal. The staff gage read 0.95 which converts to 14.76 cfs of water or 4.0 cfs over your right for this time of year. The strip chart on the recorder indicated you have been over-diverting on an average of $2 \frac{1}{3}$ cfs for the past month. Your water right is 10.75 cfs which would be at 0.78 on the staff gage. Mr. Owens regulated the diversion down to this mark.

July 19, 1989 Mr. Owens again checked your diversion and found you to be at 0.90 on the staff gage. This would be a flow of 13.6 cfs or 2.85 cfs over your right.

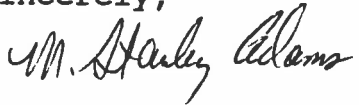

I will take this opportunity to remind you that the Sevier River system is in a critical drought stage and diversions of water in excess of the water right will not be tolerated.

Therefore, this letter will serve as official notice that if further violations occur in the diversion of water for the Coyote East Fork Irrigation Company from this date forward legal action will be taken against the company. Possible closure of the diversion could occur.

Coyote East Fork Irrigation Company

I would like your immediate attention and cooperation in this matter.

Sincerely,

A handwritten signature in cursive script that reads "M. Stanley Adams".

M. Stanley Adams, P.E.
Area Engineer
